IN REPLY REFER TO

Bismarck, North Dakota
December 14, 1939

Watson E. Beed, Refuge Manager
Sand Lake Migratory Waterfowl Refuge
Columbia, South Dakota

Dear Mr. Beed:

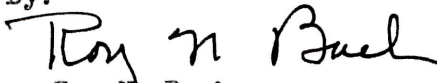

We are sending George Wilson five gallons of rabbit repellent paint received from Denver. This paint is to be applied on the trees of the Tewaukan tree plot.

We have sent Mr. Wilson instructions for the application of this paint but it would simplify matters a great deal if you could send him a three or four-inch brush for the application of this paint.

We have suggested to Mr. Wilson that the quicker this paint is applied this fall the better since it spreads and is applied much more readily in warm weather than in cold.

Yours very truly,

FRANK VAN KENT,
Acting Project Administrator
